**PLEASE FAX CLINIC FORM WHEN PATIENT HAS STARTED ON TREATMENT- 403-944-6559**

### POST-COMPLETION FOLLOW-UP

12 weeks post-treatment completion date \_\_\_\_\_

**HCV RNA Test Results: Date:** \_\_\_\_\_

**Not detected**  **Detected**  viral load: \_\_\_\_\_

**ALT:** \_\_\_\_\_ **AST:** \_\_\_\_\_

Patient counselled that HCV RNA not detected 12 or more weeks after last dose of medication indicative of permanent cure.

Informed patient HCV antibodies will be positive life long and are not indicative of infection. If ever concern of reinfection, HCV RNA will need to be checked.

Patients who have been cured are not immune to HCV and can be re-infected. Discussed harm reduction measures where appropriate. Patients at risk of reinfection should have HCV RNA (NOT anti-HCV) rechecked annually.

### TREATMENT INTERRUPTION OR LOST TO FOLLOW UP
